motion artifacts, and ventilator for magnetic resonance imaging, 18
muscle, ratio to subcutaneous fat, 71
musculoskeletal disorders in childhood, 834
myelography, in Déjerine–Sottas syndrome, 589

N

networks, radiology, 162
and personal computer needs, 167
neural tissue metabolism, iopamidol affecting, 798
neuroblastoma in childhood, 433
neurologic disorders in childhood, 833
neuropathy, progressive, in Déjerine–Sottas syndrome, 589
neutrophil response to iodipamide ethyl ester particles, 562
nitroxyl spin labels, in magnetic resonance imaging, 125
nutrition, and fat/muscle ratio, 71

O

observer performance
and clinical history affecting detection of lesions, 532
in computed tomography of ovarian cancer, 31
and evaluation of screen–film systems, 734
and receiver operating characteristic curves, 720
in rheumatoid arthritis assessment,
ocular motility disorders, magnetic resonance imaging in, 311

oleic acid, pulmonary distribution of, 102, 618
Omnipaque, *see* iohexol
osmolality of contrast media, effects of, 240
  in carotid artery studies, 340
osteoarthritis of sternoclavicular joint, 227
osteomyelitis, and malignant otitis externa, 584
osteoporosis, postmenopausal, estrogen therapy affecting, 369
otitis externa, malignant, and osteomyelitis, 584
ovarian cancer, computed tomography in, 31
oxalosis, primary, in childhood, 76
oxygen deficiency, and magnetic resonance spectroscopy of liver, 156

P

pain
  and flank mass in retroperitoneal pseudomyxoma, 419
  left upper quadrant, and intermittent bacteremia, 488
  right upper quadrant, in Caroli's disease, 670
parathyroid gland, postoperative sonography of, 186
pediatric radiology
  advances and current practices in, 833
  bilateral abdominal masses in asymptomatic infant, 355
  development of, 608
  intracranial mass in neonate, 360
  in oxalosis, primary, 76
  progress in tumor therapy, 429
  vesicoureteral reflux detection, 519
pharyngeal swallow, hyoid bone movements in, 408
phosphorus metabolism in liver, in hypoxia, 156
photonabsorptiometry, of bone mass in rats, 336
photoradiation diagnosis and therapy, 885
platelets
  contrast media affecting, 348
  radiolabeled, applications of, 191, 611
pleural effusion
  differentiation from ascites, 391
  and position of patient (current contents), 755
porphyrins, photosensitizing, 885
portography, arterial
  in canine portal hypertension, 551
  prostaglandins in, 210
position of patient, and pleural effusions (clinical review), 755
pregnancy
  and in vitro fertilization techniques, 503
  and ultrasonic fetal weight estimation, 571
prinzmetal angina, current concepts of, 663
prostacyclin balance with thromboxane A_2, after coronary streptokinase infusions, 206
prostaglandins in mesenteric pharmacoangiography, 210
proton relaxation times, *see* magnetic resonance imaging, relaxation times in
pseudomyxoma, retroperitoneal, 419
pulmonary vein, communication with bronchial circulation, 24
pyarthrosis, perfluoroctylbromide as contrast agent in, 49

R

radiation therapy, in lung cancer, 180
radiogrammetry of bone mass, in rats, 336
rare-earth screen–film systems, comparisons of, 654, 734
reflux, vesicoureteral, in childhood, 519
relaxation times, *see* magnetic resonance imaging, relaxation times in
reliability of observers, *see* observer performance
Renografin, *see* diatrizoate
research
  and medical writing (current contents), 894
  and need for radiologists, 383
  opportunities in, and specialization in radiology, 91
residencies in radiology, *see* education in radiology
resin-embedded tissues, cytochemistry and microangiography of, 714
retinoid therapy, spinal hyperostosis from, 41
retraction notice, 97
rhabdomyosarcoma in childhood, 435

S

sacroiliitis, perfluoroctylbromide as contrast agents in, 49
saline agents, heated for renal ablation, 56
scintigraphy
  esophageal (current contents), 683
  pulmonary, inhaled agents for, 451
  ventilation/perfusion, in pulmonary embolism, 443; (critical review), 940
sclerosing agents, gallbladder, 400
  absorption of, 396
screen–film systems, comparisons of, 654, 734
sedation, and driving ability after fentanyl or diazepam, 717
sensitometry of screen–film systems, 654
serotonin, and lymph node visualization by angiography, 201
sex, and bone mass in rats, 336
shunt tube, ventriculoperitoneal, medulloblastoma metastasis through, 98
smoking, and lung cancer, 80
sodium tetradecyl sulfate, embolization with, 217
solutrast, *see* iopamidol
sonography, *see* ultrasonography
spatial resolution analysis of computed tomography images, 260
specialization in radiology, and research opportunities, 91
spectroscopy, magnetic resonance
  of liver in hypoxia, 157
  in ventricular hypertrophy, 622
spinal cord penetration by contrast media, 151
spine
  bone mineral measurement in, 858
  hyperostosis from retinoid therapy, 41
spleen
  abscess of, 488
  in Hodgkin's disease (critical review), 437
  imaging with single photon emission computed tomography, 1
  magnetic resonance relaxation times in adjuvant-injected rats, 221
sputum cytology, in lung cancer, 86
sternoclavicular joint, osteoarthritis of, 227
streptokinase, intracoronary administration of, 206
stress, and proton relaxation times of liver, 652
subtraction angiography, *see* angiography, digital subtraction
swallowing, hyoid bone movements in, 408

T

Takayasu's arteritis, 772
teratoma, intracranial, neonatal, 360
tetracycline, as gallbladder sclerosing agent, absorption of, 396
thermodilution techniques for blood flow measurements, 631
thermography of breast, 303
three-dimensional microscopy
  of chick embryo, 782
  of rat thorax and abdomen, 843
thromboembolism detection with radiolabeled platelets, 611
thromboxane A_2 balance with prostacyclin, after coronary streptokinase infusions, 206
thrombus-avid radiopharmaceuticals, in pulmonary embolism, 451
transillumination light-scanning of breast, 303
trauma of thoracic aorta, 773
trifluoroacetic acid, ethanol with, as gallbladder sclerosing agent, 400
tuberous sclerosis, cystic renal disease with, 355
tumors
  aortic, primary, 928
  blood flow to rabbit VX-2 tumors, 459
  breast sonography in fibroadenoma, 34
  feeder vessels to, 455
  intracranial mass in neonate, 360
  lung cancer, 80
    staging and therapy of, 173
  medulloblastoma
    in childhood, 432
    metastasis via ventriculoperitoneal shunt tube, 98
  ovarian cancer, computed tomography of, 31

retroperitoneal pseudomyxoma, 419
therapy of pediatric malignancies, 429
Turner's syndrome, and fetal cystic hygroma, 282

U

ulcer of foot in diabetes, thickness of foot pad in, 45
ultrasonography
of breast, 300
in fibroadenoma, 34
whole-breast systems (critical review), 753
in burn-depth assessment in porcine skin, 645
and calculation of fat/muscle ratio, 71
in fetal weight estimation, 571
of foot sole thickness, 45
of kidneys, in hemolytic uremic syndrome, 547
of menisci of knee, 332
in oxalosis, primary, 76
parathyroid, postoperative (critical review), 186
of soft tissue foreign bodies, 275
urinary tract
pediatric disorders, 838
vesicoureteral reflux detection in childhood, 519
Urografin, *see* diatrizoate
urography, comparison of contrast agents in, 144
Urovist, *see* diatrizoate

V

valsalva sinus abnormalities, 769
ventilation/perfusion scanning, in pulmonary embolism, 443; (critical review), 940
ventilator for magnetic resonance imaging, 18
ventriculoperitoneal shunt tube, medulloblastoma metastasis through, 98
vesicoureteral reflux, detection in childhood, 519
videodensitometry
digital subtraction angiography, 637
of pulmonary vessels in pulmonary hypertension, 906

W

water content
in kidney, magnetic resonance imaging of, 12
in liver, and relaxation times in NMR studies, 320
ventricular, in hypertrophy, 622
weight
fetal, ultrasonic estimation of, 571
loss of, diarrhea and lymphadenopathy with, 808
Whipple's disease, 808
Wilms' tumor, 433
women in medicine, 496
writing, medical (current contents), 894

Y

ytterbium-DTPA, as intravascular contrast agent, 802
yttrium filters, for exposure reduction (critical review), 601
